

# INFO 4001 THESIS A

## Meeting Record

---

Student Name: Shimiao Sun  
Supervisor: Dr Xi Wu  
Date/Time: 16/09/2024 Monday 3:30-4:20 pm

1. Summary of progress from last meeting:

Read references about UAV delivery system frame and the usage of blockchain-based security. Build and design a brief scenario of UAV Fleet system for parcels delivery in smart city.

2. Items discussed during meeting:

Discussed scenario of UAV Fleet System for parcels delivery with supervisor. Several Questions: 1. How MUAV communicate with and guide SUAV to reach their next location? 2. Compared with base station and pre-defined transmitter on the ground, what are the benefits/drawbacks of using MUAV in smart city? 3. MUAV may have power limitation while working for a long period of time in the sky.

3. To do for next meeting:

Read at least 5 references about UAV communication and UAV delivery system. Write a summary of what I got before Friday morning. Try to fix and improve the scenario.

4. Date of next meeting:

20/09/2024 Friday 3-3:30 pm
