

INFO 4001 THESIS A

Meeting Record

Student Name: Shimiao Sun

Supervisor: Dr Xi Wu

Date/Time: 23/09/2024 Monday 3-3:30pm

1. Summary of progress from last meeting:

Read and summarized five references about smart city, UAV communication and UAV delivery system, improved my project scenario based on what I got from those references.

2. Items discussed during meeting:

1. Discussed different types of aerial platform capabilities for wireless network. Decided to use multiple Helium airships with a line linked to the ground to substitute MUAVs.
2. Discussed pros and cons of Bluetooth and WiFi communication. Decided to apply Bluetooth connectivity between SUAVs and airships and apply Wi-Fi connectivity between airships base stations, ground base stations and warehouse.

3. To do for next meeting:

1. carefully read and understand the paper "a process calculus for mobile ad hoc networks".
2. Read and check the working range of SUAVs and the survey of smart city to know how the ground base station implemented and worked.
3. Make a summary on what I got for this week's research.
4. Write a brief prototype of project scenario. (Will do it during the mid semester break)

4. Date of next meeting:

27/09/2024 Friday 3-3:30pm
